Top 10 Reasons to choose Navigator GPS

Navigator GPS automates, simplifies and increases your prepress production in many different ways. Below are the top 10 reasons why businesses like yours choose the Navigator GPS solution:

1. Navigator GPS provides a NEW and simple to learn user interface
2. Offers operators the ability to easily create custom workflows
3. Accommodates previewing of processed jobs at the prepress workstations (Mac and PC)
4. Unhindered productivity-no halting the RIP to preview or check status
5. Operator control and feedback of the RIP from prepress workstations
6. Provides unlimited user defined workflows that increase and simplify production
7. Offers user definable inspection checkpoints to insure correct output at any stage of production
8. Optional PDF Creation and Preflighting, with error reporting and generation of certified PDF files
9. Manages multiple RIPs and supports load balancing
10. Typical payback under 12 months

The standalone Harlequin RIP supports:

1. Hot folder submission of jobs only.
2. No RIP feedback without going to the RIP workstation
3. Limited feedback of Active and Finished queue's
4. Preview (roam) jobs in one of two limited views at the RIP station only requiring the RIP to be halted and decreased productivity.

Why Xitron?

As an independent RIP and workflow solution provider our entire company focus and expertise is on providing quality solutions that allow our customers to get “up and running” faster. With nearly 30 years of experience in the graphic arts industry, Xitron understands the needs of our customers allowing us to resolve issues fast and efficiently.

Xitron offers quick access to our resources for problem resolution meaning faster resolutions and increased productivity. Our entire business has been based on driving a large number of output devices. Your past, current and future devices will most likely be supported, protecting your investment.

The “stair step” approach of Xitron solutions, allow our customers to upgrade the RIP or workflow today and make the decision on output later. This approach is perfect for allowing customers to expand the prepress department in steps saving time and money and training.
